PROFESSIONAL EXPERIENCE

SBCOMP
Software Development Manager
SBCOMP : MAY 2022 to DEC 2023

As an accomplished Software Development Manager and Scrum Master with over ten years of experience in IT industry, I have honed my expertise in leading dynamic software teams to create innovative solutions. My career is underscored by a steadfast dedication to Agile and Scrum methodologies, embedding these principles deeply within the realm of software development.

In my capacity, I seamlessly merge the technical precision required of a Software Development Manager with the strategic vision characteristic of a Project Manager. I cultivate an environment that is inclusive and conducive to the growth of all team members, prioritizing innovation, excellence, and ongoing enhancement. My leadership is marked by clear objective setting, robust communication, and an active role in team mentorship and direction.

My skills extend to handling intricate software projects, providing technical advice, and keeping an eye on the larger project goals. I am proficient in reducing risks, refining processes, and ensuring project completion within designated scopes and budgets, showcasing my dual expertise in software development and project management.

Moreover, I am enthusiastic about transforming conventional practices with Agile methodologies, thereby increasing productivity and team efficacy. My ability to establish solid partnerships across diverse departments is a testament to my knack for fostering collaboration and synchronizing with business objectives.

In terms of team building, I focus on recruiting, training, and maintaining a group of software developers who are not only technically skilled but also agile and responsive to evolving project needs. Integrating AI augmentation into our processes has been a game changer, enhancing our capabilities in project management and software development. This AI integration assists in analyzing complex data, automating routine tasks, and offering predictive insights, further boosting our efficiency and decision-making processes. The collective triumphs of my team and our significant contributions to the company's achievements are my greatest rewards.

SKILLS:
1. Leadership
2. Business Process Improvement
3. Agile Methodologies
4. Software Project management
5. Performance Management
6. Key Performance Indicator
7. AI Augmentation
